**Subject** SSTRAD-Special Studies Rad Tech  
**Course Number** 277A  
**Discipline** Radiological Technology  
**Course Title** CT Basics

**Course was formerly:**  
**Cross Listed Course**  
**Catalog Course Description** Computerized Tomography Physical Principals, Clinical Applications, and Quality Control.

**Statement of Need as it pertains to the mission of Fresno City College:**  
 The medical field is in need of radiologic technologists with their Computerized Tomography (CT) certification. This course will cover the didactic component of the requirements for national examination certification eligibility. Instructor and classroom space. Students must be a graduate of an accredited radiologic technology school.

**Anticipated Costs:**  
**Special Requirements:**  
 This course will be utilized as a post-radiologic technology certification introduction to the specialty of Computerized Tomography (CT).

**Relationship to existing courses:**

**Program Placement:**  
 Is this course part of an existing or new program? No  
 Is this a stand-alone course? Yes  
 Requesting placement for Pattern Number for AA/AS Degree General Education Area No

**Local Articulation with Reedley College:**  
 FCC faculty have communicated about this course with appropriate faculty at Reedley College? No  
 This course is acceptable in lieu of a course at Reedley College. No

**4-year Institution Articulation:**

**Contact the Articulation Officer in the Counseling Center for assistance in determining the correct placement.**

Request Transfer CSU list No  
 Request UC transfer No  
 Request placement in Pattern Number for: No  
 Articulates with a CSU Fresno course: No

**Proposal Information**

**Proposed Start** Year: 2014 Semester: Summer  
**Requested Credit** Credit - Degree Applicable  
**Classification (Applicable)** Transferable[]  
 Credit - Degree Applicable Non Transferable[]  
 Credit - Nondegree Applicable [X]  
 Noncredit[]

[Done](#)

Upon satisfactory completion of the course, students  
will be able to:

1. Describe the historical perspectives of the multiple generations of Computerized Tomography (CT) development.
2. Identify the various types of CT scanners utilized in the facilities.
3. Explain the process of data acquisition, image reconstruction and image display.
4. Evaluate technical factors and determine the least exposure to the patient.
5. Explain the manipulation of window width and window level.
6. Define the scanning protocols for the various areas of the body.

**Help**

If the text in the content area has been cut and pasted, causing a different font and/or difficulty in formatting the outline, do the following: Select all text, then type Ctrl 0 (zero). This will put the text into an editable outline form and into the right font that will match the rest of the outline. Then edit the old text by backspacing to undo the outline form so you can use the

outline formatting  
tools in curricunet.

### Help

In order to add  
 requisites, a requisite  
 analysis must have been  
 performed on the  
 previous pages. For  
 content review, it is  
 required that the  
 requisites and requisite  
 analysis be reviewed  
 and approved.

To add a requisite,  
 choose the appropriate  
 type from the drop-  
 down menu, then click  
 "Add."

Then choose a course  
 number and title. If  
 none are present, you  
 must first perform a  
 requisite analysis on the  
 previous pages.

A minimum grade that  
 is acceptable for this  
 requisite is unnecessary  
 since all prerequisites  
 have a minimum grade  
 of C already defined.  
 If students must take  
 this course "and"  
 another course, or if
