Page 1: After reviewing the LB iLearn course, complete the following questions based on your expertise.

Q1 What is the name of the course you are evaluating?

AH 199 CS for Medical Professionals

Q2 Describe the background, expertise, experience, qualifications and education that make you qualified as a Subject Matter Expert to review this course.

See resume/vita.

Q3 Are the outcomes for the course appropriate to what students should be able to do or know to be successful in the profession and/or field?

Yes,

Explain.:
The title and outcomes do not really match. You might think about changing the title to Computer Applications for Medical Professionals because CS implies you will teach programming. The course description is a little misleading with file management skills because you don't really specify this in the outcomes, unless you consider transforming files to pdf file management (see #7 comment to add more file management skills). I would also consider adding something about desktop and cloud-based applications to the description. Typo/update: ... encrypt MS Office docs with password).

Q4 Do the skills taught in the course prepare students for the profession?

Yes

Q5 Does the course holistically contain appropriate content related to the profession?

Yes

Q6 What recommendations so you have for improvement that would make the course better align with the profession?

None

Q7 What content needs to be developed to meet upcoming industry needs?

Consider adding the following to the outcomes/skills:

Windows 10

Utilize desktop mail (MS Outlook/Calendar)

Creating pdf forms and electronic signatures

File management: zipping/unzipping files, maybe changing file permissions, and restoring previous versions of files
