Page 1: After reviewing the LB iLearn course, complete the following questions based on your expertise.

Q1 What is the name of the course you are evaluating?

Art 102 16.0

Q2 Describe the background, expertise, experience, qualifications and education that make you qualified as a Subject Matter Expert to review this course.

I attended Utah Valley University and received my BA in Deaf Studies and a minor in music. I have also interpreted several college level classes, including introductory art.

Q3 Are the outcomes for the course appropriate to what students should be able to do or know to be successful in the profession and/or field?

Yes,

Explain.:

Students who complete a course in Art 102 should be able to have a general understanding of visual art and how it is presented culturally and in the media. This is a very broad statement, but an introductory course should cover a broad base, not necessarily depth. The second aim of the course is for students to complete visual art of their own and be able to identify the form and content as well as influencing artists and art pieces. This outcome is important for students to be able to apply the course material to themselves, their thought processes and use it in actually real life applications. The third outcome aims to have students understand and apply art vocabulary, how to evaluate art and apply concepts. This should be a key element in any course, so students are prepared to discuss principles with future colleagues or future students.

Q4 Do the skills taught in the course prepare students for the profession?

Yes,

Explain:

The various skills taught in this course cover a very broad base of art concepts, such as paint medium, all the way to cinematic renditions in the media. Various vocabulary, artists, and time periods are also covered giving a good foundation for any aspiring art professional. The skills taught in the art 102 course fulfill the goals to give students a general understanding of varying visual art pieces and art forms in the media and prepares students for the profession.

Q5 Does the course holistically contain appropriate content related to the profession?

Explain:

Yes. The content is easily accessible and well organized. The format is predictable and the course content is presented to satisfy many learning styles, such as visual presentation, auditory, reading material and hands on learning. The content is also related to the course objectives.

Q6 What recommendations so you have for improvement that would make the course better align with the profession?

In the course objective's it does state students should be able to explain concepts from the class verbally and in writing, however I did not see any assignments that required students to communicate verbally. I would suggest students be required to present the material in front of friends of family to fulfill this objective. Or maybe record their presentation and upload to canvas.

Q7 What content needs to be developed to meet upcoming industry needs?

I can not recommend any content that was not already covered in this course. It is very thorough.
