

# GRIFOLS

Grifols Biologicals Inc.

## Employment Opportunities Position: Manufacturing Technician

Grifols is seeking individuals who are interested in building a career with a successful worldwide pharmaceutical company. Manufacturing Technicians are responsible for processing life saving plasma products. We are looking for dedicated, hard working individuals who are team players. We will TRAIN and DEVELOP these individuals for advancement within our company.

Grifols offers an excellent benefits package, including medical, dental, vision, 401(K) plan, life insurance and paid holiday and vacation time.

### Job Qualifications

- High school diploma/GED required. A.S. or current students, preferred.
- English fluency both verbal and written
- Basic math skills with proficiency in metric system use
- Basic computer skills
- Ability to lift/push 50 lbs.
- Work well with others in a team environment is essential
- Self-starter with the ability to work independently and use good judgment
- Must be proactive, results oriented, and have strong attention to detail

### Description:

- Preparation of equipment and commodities for production of plasma-derived pharmaceuticals.
- Strong emphasis on documentation according to FDA regulations.
- Numerous certifications required for various procedures and areas in production.
- Strict adherence to procedures and practices according to Good Manufacturing Practices.
- All work performed in clean room (sanitized) manufacturing environment.
- Varying areas of production perform or work with lab tests, centrifuges, computerized equipment, chromatography, filtration systems, sterilizing, aseptic filling systems, or cold room.
- Several shifts are available, including day, swing, grave and weekends. Premium pay may apply for certain shifts.

Grifols has been a leader in the healthcare industry since 1940 by creating innovative products and services based on the values of ethics, quality and responsibility. Grifols' activities focus on fulfilling the needs of its patients as well as healthcare professionals working in therapeutics, pharmacy, diagnostics and blood banking. For more than 60 years, Grifols has developed, manufactured and marketed products designed to improve human health. At its Los Angeles facility, Grifols manufactures plasma derived biopharmaceutical products of proven efficacy, quality and safety.
