

AGRICULTURAL BIOTECHNOLOGY

The **Agri-Biotechnology Program** produces career pathways into biotech industries. The project will redesign courses into a variety of digital materials: online course modules, blended learning delivery, interactive television delivery, virtual laboratories, and real-time online learning. Available space will be used at remote campuses for labs and supplemented with specialized mobile science laboratory. Locally, CCCC will develop a biotechnology lab and classroom. This New and improved program is funded by the U. S. Department of Labor through the TRAC-7 grant program.
