

## Assignment 3 Requirements

In the last class we went over a case study on a UI redesign that focused on the collection of user requirements. The goal of this assignment is to get you to start thinking further on your final project in specific as to how you on

1. the requirements aspects that we have been discussing up to this point. Answer the following:
2. What methods will you use to collect requirements?
3. Describe the requirements that you will collect for this project?
4. How can you apply the concept of Tokairo's system audit to your project?
5. In your opinion what is the benefit to collecting requirements? How does it effect this project?
6. I would like you to summarize the requirements you have or plan to collect for your project in a similar manner to the case study in the book. Try to provide as much detail as possible. This content can be included in your final project.
