

SUPPLY CHAIN MANAGEMENT INDUSTRY RECOGNIZED CERTIFICATIONS

Supply Chain Management Principles

Supply chain management is one of the fastest growing fields today. It is also expansive, as there are many functions and roles within it. This certification course is intended to train students in the basics of the supply chain and the supply chain's roles within organizations.

Inventory Management

This certification prepares students to understand inventory management controls and how inventory management interacts with warehousing, transportation, demand planning and other supply chain areas.

Demand Planning

This certification course prepares students to understand the dynamics of forecasting and demand planning from requirements of the sales department and the translation of those requirements into the just-right orders for raw materials.

Manufacturing & Service Operations

Manufacturing and service operations are key components in the supply chain process once the raw or semi-finished materials arrive for production. This certification course prepares students to understand how manufacturing and service operations work together to control overall efficiency and expense in the conversion of materials into products and services.

Customer Service Operations

This certification course will provide students with an understanding of customer service and order management processes, techniques, and terminology that support order fulfillment and management.

Transportation Operations

This certification course is intended to train students in the basics of transportation operations as it relates to: modes of transportation, transportation technology, impact of transportation on the overall economy, and sustainability.

Warehousing Operations

This certification course is intended to train students in the role of warehousing in the supply chain, facility configuration, storage and handling techniques, performance metrics, customer service considerations, and safety concerns across various types of distribution facilities.

Supply Management & Procurement

This certification provides students with an understanding of strategic sourcing, supplier management, and the procurement execution process.
