

Kellogg students succeed in careers in manufacturing.

*“I work for AST as a quality inspector,” said Anthony Gibbs. “I graduated in June 2015 from **Kellogg**. The program was interesting and because of the knowledge I gained I was able to excel and move from an operator to a quality inspector. There is no way I’d be where I am today without this program.”*

Eight Michigan community colleges formed the Michigan Coalition for Advanced Manufacturing (M-CAM) to enhance and create training programs in the in-demand areas of welding/fabrication, CNC machining, production operation and multi-skilled/mechatronics.
