

Lake Michigan College students are prepared for jobs in manufacturing.

“I’m very impressed with both my shop teachers,” said Steven Parrigin. “They give you hands-on experience in everything that you would see in the outside world. They do act like real bosses. They make you produce actual good products inside the class, which I think is good.”

Eight Michigan community colleges formed the Michigan Coalition for Advanced Manufacturing (M-CAM) to enhance and create training programs in the in-demand areas of welding/fabrication, CNC machining, production operation and multi-skilled/mechatronics.
