Macomb Community College students receive expert training.

"Over the next 10 years in the state of Michigan alone there will be more than 600,000 manufacturing jobs that will be required to be filled," said Paul Aiello, FANUC America Corporation, a leading supplier of robotics and advanced automation. "With employer partnerships, **Macomb Community College** and the other schools in M-CAM are providing the skills and knowledge and industry credentials to prepare students to fill those manufacturing jobs."

Eight Michigan community colleges formed the Michigan Coalition for Advanced Manufacturing (M-CAM) to enhance and create training programs in the in-demand areas of welding/fabrication, CNC machining, production operation and multi-skilled/mechatronics. **m-cam.org/colleges/macomb/ macomb.html** 

## M-CAM prepares participants for 21<sup>st</sup> century jobs in advanced manufacturing.
