

**PROCEDURE: REMOVING STERILE GLOVES**

**Equipment/Supplies:** One package of sterile gloves in the appropriate size

**Standards:** Given the needed equipment and a place to work, the student will perform this skill with 80 % accuracy.

**Key: 1** = Satisfactory

**0** = Unsatisfactory

Action	Satisfactory	Unsatisfactory
1. Removed rings and other jewelry.		
2. Washed your hands.		
3. Chose the appropriate size gloves and apply one glove to each hand.		
4. Pulled the glove away from the nondominant hand.		
5. Slid the nondominant hand out of the contaminated glove while rolling the contaminated glove into the palm of the gloved dominant hand.		
6. Held the soiled glove in the palm of the gloved hand.		
7. Slipped the ungloved fingers under the cuff of the gloved hand.		
8. Stretched the glove of the dominant hand up and away from the hand while turning it inside out with the nondominant hand glove balled up inside.		
9. Removed contaminated gloves as one unit into a biohazard waste receptable.		
10. Washed your hands.
