

Example: Label all marks on the following scales. The units are inches.

Example: Find the dimensions given on the following inch rules. Express all fractions in lowest terms.

- a. _____
- b. _____
- c. _____
- d. _____
- e. _____
- f. _____
- g. _____
- h. _____

$$\frac{12in}{1ft}, \quad \frac{1ft}{12in}, \quad \frac{3ft}{1yd}, \quad \frac{1mi}{5,280ft}$$
$$A \times \frac{B}{C} = \frac{A}{1} \times \frac{B}{C} = \frac{A \times B}{C}$$

This means This

Plan
miles
Feet
inches

$$\frac{2.1 \text{ miles}}{1} \cdot \frac{5280 \text{ ft}}{1 \text{ miles}} \cdot \frac{12 \text{ in}}{1 \text{ ft}} = 133056 \text{ in}$$

1 year = _____ minutes

10 ft = cm

1.3 miles = meters

Practical Problems:

1a. Measure the length, width, and height of your piece of Aluminum 6061 in inches.

Inches

length =

width =

height =

b. Take each measurement and convert it from inches to centimeters. *(You must show your work for full-credit.)*

| Inches | Centimeters |
|-----------------|-------------|
| length = | |
| width = | |
| height = | |

c. Measure the length, width, and height of your piece of Aluminum 6061 in centimeters.

Centimeters

length =

width =

height =

d. Was there some difference in the measured length and calculated? If so why?

-
2. Express the length of this pipe in inches.

-
4. Researchers have recently “cracked the code” of the Aztec system of measurement. Their basic unit of length was the rod, which is approximately 8 ft. Other units are defined in terms of the rod (rd) on the right. Use these definitions to calculate:

- a. The numbers of rods in 35 hearts

5 hands = 3 rods

2 arrows = 1 rod

5 hearts = 2 rods

- b. The number of bones in 4 arrows

3 arms = 1 rod

5 bones = 1 rod
