$a_{n}=a_{1}+d(n-1)$
$S_{n}=\frac{n}{2}\left(a_{1}+a_{n}\right)$
$a_{n}=a_{1} r^{n-1}$
$S_{n}=\frac{a_{1}\left(1-r^{n}\right)}{1-r}$

Simple Interest: I = Prt
Calculating the amount for compound interest paid n times per year: $A=P\left(1+\frac{r}{n}\right)^{n t}$
Calculating the amount for compounding continuously: $A=P e^{r t}$
Loan Payment Formula (for homes, cars, etc.) You can also use the APPS on your Graphing Calculator.

$$
P M T=\frac{P\left(\frac{r}{n}\right)}{\left[1-\left(1+\frac{r}{n}\right)^{-n t}\right]}
$$
