Our traveling team includes two simulation staff and 8 CAE Simulators. When traveling to a site, we usually transport between 1 – 3 simulators plus supplies.

Our new 8,500 square foot facility features 4 simulation rooms, 2 trauma rooms, 6 debriefing rooms, ambulance bay, decontamination area, nurses station and patient waiting room. Currently, it serves as the only stand-alone patient simulation center in this region.

The center offers:
- ACLS and PALS simulated sessions
- Competency practice
- Paramedic, EMT, Nursing, Certified Nursing Assistant, and MA skills practice
- Debriefing
- Certified simulation staff assistance
- Interdisciplinary sessions
- TeamSTEPPS training
- State of the art equipment
- Professional moulage
- Realistic scenarios
- CAE simulators including: Lucina the birthing simulator who has delivered over 100 babies in her career, Caesar our trauma guy, iStan, 2 METIMen, an 8-year old child and a 9-month old simulator.

Our vision is to become a regional “Center of Excellence” for initial, follow-on, and advanced skills training in various medical fields thereby positively impacting healthcare in the surrounding areas. We will continue to provide state-of-the-art education for our students and healthcare partners through the use of medical simulation with a focus on interdisciplinary environments.
