

Name: _____

MATH 1500: Quiz Ch. 1

Perform the following operations. You may not use a calculator. Please show your work.

1. 16×23

2. $399 + 149 + 279 + 49$

3. $10.00 - 8.76$

4. $(5 + 15 \div 3) \times 2$

5. You are deciding between two job offers, one is with Adaran and the other is Beckany. Adaran will pay \$24/hr plus health benefits. Beckany will pay \$28/hr with no health benefits. Health insurance would cost him \$500/month. Assume he works an 8-hour day and an average of 22 days per month. Assume you need health insurance, which company should you work for, and why?
