Overall Summary:

This lab sheet on lab hazards is a generic listing of possible hazards that may be present in a steel and fabrication shop. There are a lot of variables that one in the welding industry may be exposed to; some not listed on this sheet. As a recommendation, it may add value to mention that not all hazards one may encounter are listed on this one sheet. Another recommendation would be to reference ANSI Z49.1 and the American Welding Society Safety and Health Fact sheets.
