Privacy, Security, Ethics for Nurses

IST Module Learning Objectives: Identify ways to maintain patient privacy and confidentiality of patient information in the hospital setting when using health information technologies. Discuss security measures used to prevent data breaches and ensure security of patient information. Discuss the effect of HIPAA, the Omnibus ruling and other regulations on patients' rights as they pertain to health care information in the electronic setting. Discuss ethical challenges brought about by the use of health information technology and electronic medical records. Discuss the role of the nurse in ensuring patient privacy, confidentiality and security of the patient's personal health information.

Defining the Core Clinical Documentation Set for Coding Compliance

It is time to examine coding compliance policy and test it against the upcoming challenges in clinical documentation and associated coding the health information management (HIM) professional staff in your organization will face in 2013 and 2014. Whether your medical record is paper-based, electronic, or hybrid, a high-integrity coding compliance policy should be written and updated at least once per year as part of an information governance framework. This paper offers guidance on identifying key source documents and clinical documentation that make up the core designated clinical documentation set. A core designated clinical documentation set for coding should be used as the key constant source of clinical documentation by coding professionals as they conduct all the medical coding for...

What is a career pathway?

Friday, August 26, 2016

Posted in category: Did You Know? by Lydia

Rather than focusing on a job as an end result, people are encouraged to look at a career pathway. This means a series of structured and connected education programs that help students advance to better jobs (and higher income) over time...
