Ready to Use Content Elements

You don't have to figure out specific content elements – there are 40+ content elements available out of the box for you to choose from. All you have to do is add content element to your WordPress page and easily style it to fit your needs.

Custom Post Type Support

If you are having custom post types on your WordPress site no worries. Visual Composer works just great with custom post types resulting in ability to offer you one-stop tool for all of your WordPress site content.

Responsive Design Options

Whenever you build your WordPress page with Visual Composer it is automatically designed to be responsive. In addition there are powerful options available to adjust necessary settings for better responsiveness and content adaption for mobile devices.

Tons of Add-ons Available

Because of Visual Composer API it is really easy to extend page builder plugin with your own functionality like add-on or change existing one. At the moment there are 100+ independent add-ons available through Envato CodeCanyon marketplace.
