Key Issues and Technical Assistance Needs

This section should be used to summarize the issue or problem encountered during the quarter and resolution of previous issues and challenges identified in previous quarters. Describe any actions taken or plans for addressing issues, any question you have for NIC, and any need for assistance from NIC or others. If ISU has nothing to report, that should be specified.

Best Practices, Promising New Strategies and Success Stories

This section should be used to describe promising approaches and innovative. Examples may include developing and implementing an outreach plan, developing new or enhancing existing curriculum, and creating new career assistance tools and resources. Throughout the implementation of the program, ISU may discover new strategies that emerge as a result of data-driven continuous improvement. The new strategies may or may not have significant levels of evidence at this point in the program; however, they should still be described here. As progress is made with a new and promising strategy, or as data/evidence is gathered to support it, ISU should document the progress and data/evidence each quarter. ISU may also describe any lessons learned and how those lessons learned will be implemented.

This workforce solution was funded \$6,438,050 (100% of its total cost), from a grant awarded under the Trade Adjustment Assistance Community College and Career Training Grants, as implemented by the U.S. Department of Labor's Employment and Training Administration.
