Funding may be available to cover the cost of this training!

This workforce solution was funded by a grant awarded by the U.S Department of Labor's Employment and Training Administration. The solution was created by the grantee and does not necessarily reflect the official position of the U.S Department of Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership.

The Industrial Safety Technology/Technician training program educates individuals on the recognition, avoidance, abatement, and prevention of safety and health hazards in the workplace. It will also provide an awareness of job-related safety and health hazards. Individuals will have the opportunity to interview for paid internships with industry partners!

[Classes Offered in the Spring 2018!](#)

SAFE 118:

This course covers topics including Introduction to Occupational Safety and Health Administration for Small Business; Public Warehousing and Storage; and Introduction to Safety and Health Management.

SAFE 235:

Machine Guarding Basics. This course familiarizes the student with various types of common machinery and the related safety standards. Guidance is provided on the hazards associated with various kinds of machinery and the control of hazardous energy sources (lock-out/tag-out).

The following Industry Partners are ready to interview individuals with these skills for PAID internships that can lead to full-time employment:

SCT (Safety Engineering * Consultation * Training)

Diamond Products
