

What is an Apprenticeship?

- An apprenticeship is a structured training program provided to an employee that is a combination of classroom instruction and on-the-job training.
- An apprenticeship is often created when an employer is unable to hire individuals with specific skills.
- This is a “grow your own” program that can provide a solution to the retirement of highly skilled employees.

Rhodes State College is experienced in helping companies start apprenticeships.

We can help your company choose the two components of an apprenticeship program:

- Classroom Instruction
- On-The-Job Work Schedule

Rhodes States College (RSC) can support your company with all the steps required to get started.

RSC has assisted 12 companies in the creation of Apprenticeship programs. Currently 115 apprentices attend classes with us.

Rhodes can assist with administrative tasks

We can further assist the creation of your apprenticeship program by becoming your Apprentice's Sponsor. This alleviates much of the administrative burden.

Tuition dollars are available from DOL

If you are ready to start, Rhodes State can help you utilize grant funding from the Department of Labor to offset approximately one year of tuition expense.
