

## COURSE OUTLINE

**Title:** Mock Accident Investigation

**Project/Course Number:** IHS436

**Contact Hours:** 3½ hours

**Project/Course Description:**

Have you ever wanted the opportunity to practice doing an accident investigation, but without the actual accident occurring? Here's your chance. Trained instructors will walk participants through a mock accident investigation.

An employee has fallen and has sustained injuries. What do you do next? How do you coordinate all of the efforts? Who do you involve? This session will give participants the opportunity to go through a real life investigation (but without any actual injuries) along with learning some key tips to consider during an actual incident investigation.

This course helps individuals learn how to investigate an accident scene and determine what information needs to be collected for recording and reporting purposes in part with OSHA 29 CFR 1904.

**Project/Course Goals:**

Upon completion of this course, the participant will be able to:

- Observe an accident scene
- Interview witnesses
- Work as a group to investigate what happened
- Learn tips to look at while investigating an accident

**Resources:**

Instructor: Qualified Instructor  
Materials: Handout Materials  
Physical Set-Up: Classroom

**Product Director/Corporate Academic Dean:** Melissa Olheiser

**Date:** 1/13/2017
