COURSE OUTLINE

Title: Scaffold Erector/User Training

Project/Course Number: IHS442

Contact Hours: 4

Project/Course Description:

This course is designed to meet 29 CRF 1926.454(a)&(b) Subpart L scaffold training requirements. Participants will be trained to recognize the hazards associated with type of scaffold being used and to understand the procedures to control or minimize those hazards.

Project/Course Goals:

Upon completion of this course, the participant will be able to:

- Identify the nature of electrical hazards, fall hazards, and falling object hazards in the work area
- Learn correct procedures for dealing with electrical hazards and for erecting, maintaining and disassembling the fall protection systems, and falling object protection systems being used
- Identify proper use of the scaffold, and the proper handling of materials on the scaffold
- Understand the maximum intended load and the load-carrying capacities of the scaffolds used
- Identify the nature of scaffold hazards
- Learn correct procedures for erecting, disassembling, moving, operating, repairing, inspecting, and maintaining the type of scaffold being used
- Learn any other pertinent requirements of the subpart
