

Statement of ADA Compliance

"An important goal of SkillsCommons is to provide equally effective access to our website, products, and technologies for all users, including those with disabilities. SkillsCommons is committed to providing an equal opportunity for all to benefit from the open educational resources within the SkillsCommons library. We strive to reduce barriers to delivering educational content on a timely basis to all. SkillsCommons endeavors to provide free and open access to instructional and program support materials that meet Section 508 Guidelines across the collection of resources developed by TAACCCT Grantees. Section 508 of the Rehabilitation Act of 1973 requires that U.S. governmental agencies with information technology products meet specified levels of compliance with accessibility standards. SkillsCommons is committed to support this progressive standard for information technology design and development and support TAACCCT grantees meeting these accessibility standards for their Open Educational Resource (OER) contributions. If you are having challenges using the SkillsCommons.org website, please contact us at support@skillscommons.org and we will work with you to resolve the accessibility challenges and/or provide an equally effective alternative access using the Equally Effective Access Planning Tool developed by the California State University."

This workforce solution was funded by a grant awarded by the U.S Department of Labor's Employment and Training Administration.
