Submit the above documents to:
Office of Admissions
Pearl River Community College
101 Highway 11 North
Poplarville, MS 39470

Why College?

Research shows that education pays. Students who complete associate degrees and certificates are more likely to move into professional positions with higher earnings. Students with a solid education beyond high school can expect to earn an average of $250,000 more in their lifetime than people with only a high school diploma.

Health Information Technology

Poplarville Campus

PEARL RIVER
COMMUNITY COLLEGE

Where your future begins

About the Program

Health Information Technology is a program of study designed to prepare students for office positions in hospitals, doctor's offices, health clinics, insurance companies, nursing homes, and other health-related organizations. A student enrolled in Health Information Technology will prepare to work in these environments as a medical billing and coding specialist, medical transcriptionist, medical office assistant, medical file clerk or medical office secretary. Health Information Technology is a 2-year program of study that requires courses in the career–technical core, designated areas of concentration, and the academic core. The Associate of Applied Science degree is earned upon the successful completion of the program.

Large amount of time, money, and research are spent by the federal government and insurance companies in an effort to control costs and provide quality health care. Because of this, office occupations in the medical field continue to be in demand with the evolvement of health care reform.
