

Map and Calculate a Career in Geomatics

(Surveying)

Now is the time to earn credentials in geomatics: the science and technology of collecting, presenting, manipulating, and using geographic and spatial data in digital form. SLCC offers an associate's degree with online and on-site courses that are taught by members of the Utah Council of Land Surveyors (UCLS).

Geomatics careers are available in many areas such as: criminology, sociology, land management and reform, air navigation, subdivision planning, the environment, urban planning, and more.

Traditional land surveying...

to modern methods of GPS & 3D laser scanning.
