

ITSE 1330 – C# Program 8

- Use the course material located at:
 - <http://www.austincode.com/itse1330/>
- Program 8 can be completed using content from the following chapters:
 - 00-Welcome! through 15-Windows Forms

Requirements (remember to identify the requirements by number):

- Create a Windows Forms application using Visual Studio.
 - Name the Solution and Project Program-8.
 - Output appropriate communication messages to the user.
 - Output appropriate results. In other words, all requirements should be output and identified by number.
1. Include a label: “This is Program-8”
 2. For Program 8, recreate Program 6 as a Windows Form application.
 3. Include appropriate controls to accept input from the user.
 4. Include appropriate controls to message state structure and object state information back to the user.
 5. Include appropriate controls to invoke the methods.
 6. Include a MessageBox that displays: “Thank you for running Program-8.” when the application is closed (hint: consider the FormClosing() event).

TEST – TEST – TEST your application to ensure the specific program requirements are met.

- Use the list above and the common requirements as a confirmation checklist.
- Not meeting all requirements = 0 points for the assignment.
