More Than You Know

Laid off? Downsized? Veteran?

Looking for a career change?

How many of these skills do you already have?

- > Ability to work on more than one project at a time
- > Attention to detail
- > Teamwork
- > Problem Solving
- > Adhering to safety and environmental procedures
- > Inspecting, testing, monitoring, troubleshooting
- > Documentation of work or procedures
- > Set-up, calibrating or operating equipment
- > Good written and oral communication skills

Chances are, you already have a set of transferable skills that would fit with a Bioscience career.

Transferable skills don't just come from one job or even several jobs. They are skills acquired as a result of formal and informal education, training, professional activities and life in general.
