

# LOOKING FOR MANUFACTURING TALENT?

Come to **Broward College North Campus** - home to the Engineering Technology program and our state of the art manufacturing lab! Broward College is one of 12 colleges across the state of Florida that is participating in the Florida TRADE Advanced Manufacturing Grant funded by the U.S. Department of labor to build manufacturing talent ([www.fltrade.org](http://www.fltrade.org)). We support the **Greater Fort Lauderdale Alliance Six Pillars Community Strategic plan** to develop and equip students, veterans, dislocated workers, and employed workers with knowledge to earn industry recognized credentials, technical certificates, and degrees.

Our core curriculum is based on the industry-defined and federally endorsed national standards set forth by the **Manufacturing Skill Standards Council** to prepare front-line production and material handling workers ([www.msscusa.org](http://www.msscusa.org)). We offer hands-on learning opportunities and specialized technical certificates in Electronics, Biomedical, and Alternative Energy.

Our manufacturing lab is equipped with the latest advanced manufacturing equipment including **programmable logic controllers, 3D printers, and robotics**. We also focus on **connecting employers with talent** through our internship and job placement programs. We support the Florida TRADE "Drive to 1,000" campaign to place 1,000 Florida TRADE students into advanced manufacturing jobs by April 1, 2016. Contact us to learn more.

We are ideally located in the heart of Broward County's manufacturing sector in the northeast quadrant at the Florida Turnpike and Coconut Creek Parkway intersection.
