Cutting Edge Programs in High Growth Fields!

NEW Programs at Capital Community College — Biotechnology and Health Information Management

Biotechnology Associate of Science Degree

Get hands-on training for a career in the exciting field of Biotechnology! Be involved in work that impacts everyday life, from the food we eat to the medicines we use and the clothes we wear. Graduates will be prepared for entry-level positions as Laboratory Technicians/Technologists in areas of pharmaceutical research and manufacturing, the food industry, the medical field or academic research. Students gain valuable real-world experience through internships with laboratory professionals, which gives them an edge in the job search process after graduation. Get started towards your career by enrolling in Biotechnology@Capital now!

Health Information Management (HIM) Associate of Science Degree & Certificate

Would you like to play a vital role in the healthcare field managing the data collection and analysis that healthcare professionals need to provide quality patient care? Are you interested in computer science, business, management, legal procedures and healthcare research? If so, HIM is for you! New laws requiring the use of electronic health records are driving the need for HIM professionals, and job growth is predicted to grow 22% over the next decade, much faster than average! HIM students will be prepared for entry level positions in health information management in a variety of settings, including hospitals, physician offices, rehabilitation centers, and insurance companies. Graduates on the job are involved in the design, collection, storage, utilization and transmission of data required to meet the legal and administrative record-keeping requirements of healthcare delivery systems. The path to your career in this fast growing part of the medical world starts by enrolling in Health Information Management@Capital!
