

If you're a high school student looking for a career in manufacturing, Florida State College at Jacksonville's FL TRADE Grant Advanced Manufacturing Training Program can put you on the fast track to get there.

You'll get hands-on training by industry experts using the latest high-tech equipment designed to meet the needs of local manufacturers. Tuition costs are low and financial aid is available to those who qualify.

In an effort to bridge the gap in manufacturing between retirees and young talent, FSCJ is partnering with local high schools, manufacturing companies and local government to successfully recruit and train high school students for high skilled, high wage jobs.

What's In It For Me?

- Get short-term training targeted to specific high-demand jobs
- **Enhance your resume** with nationally recognized certifications
- Increase your marketability with internship experience
- Network with local employers
- Benefit from **FREE** career counseling, mentoring, and placement services

Industry Certification

The Manufacturing Skills Standards Council (MSSC) Certified Production Technician (CPT) and OSHA 30-Hour General Industry certifications are nationally recognized.

In six months to a year, you will gain new skill-sets, be ready for industry certification and internship possibilities, and can earn college credits toward an Associate in Science in Engineering Technology.

Training Programs Includes:

- Safety
- Processes and production
- Quality practices
- Maintenance awareness and measurements
- Mechatronics

80%

of U.S. manufacturing companies surveyed are willing to pay more than current market rates to hire and retain skilled workers to fill the current talent shortage.
