

IMPACT Website

[The Innovations Moving People to Achieve Certified Training \(IMPACT\) website](#) is designed to serve as a central springboard and as a medium to provide information about the project along with each respective consortium partner's stackable credentials, staff contact information, workshops, career pathways, outreach materials, link to the online training component: ToolingU, Virtual simulation information: Second Life, related careers with average wage ranges and local job listings provided by NEWorks, and our social connections. The website has been designed to be responsive so participants can easily navigate the site regardless of the device used to view it.

The Nebraska Consortium of community colleges is comprised of equal opportunity/affirmative action institutions.

Searching for employment or looking for a better opportunity?

Set Yourself Apart

in a high-wage, high-demand career in manufacturing. Earn skills and industry-recognized credentials.

A consortium of Nebraska community colleges collaborated to develop a new **Diversified Manufacturing Technology Certificate** which provides industry-endorsed training and education in Safety, Quality, Production, and Maintenance. This Certificate is aligned with national skill standards and is offered at:

Central Community College
Metropolitan Community College
Northeast Community College
Southeast Community College
Western Nebraska Community College

After earning the Certificate, students may choose to enter employment or continue their education in one of several career pathways. To explore these pathways click on the icons below.

- Advanced Manufacturing
- Mechatronics
- Quality Technology
- Drafting and Design
- Welding
- Instrumentation
- Energy Operations
- Diversified Manufacturing Technology

Growing Nebraska's Workforce

Nebraska needs more highly skilled workers for high-paying advanced manufacturing careers. Many potential workers lack the skill sets needed, do not have the resources necessary for receiving the credentials or degrees required, and the current training programs do not provide the flexibility to work while furthering education. Project IMPACT addresses these challenges and aims to increase achievements of certifications, credentials, diplomas, and degrees through blended learning combining experienced instructors, advanced labs, and modern technology that will help support students in their journey to set themselves apart.
