

Basics of the Engine Lathe 115

After you complete the class, return to the page with the class vocabulary list on it.

Write a report (3–5 paragraphs) describing the parts of the engine lathe. Use your own words; do not plagiarize. Underline all vocabulary words used in your report.

1. Your first paragraph should introduce the reader to the engine lathe. Tell the reader briefly what it is and some of the key components.
2. Your next paragraph(s) should talk about the components in more detail.
3. Your last paragraph(s) should summarize your report and provide a closing sentence.

Writing tips

Plagiarize: to use the words or ideas of another person as if they were your own words or ideas.

A report is a type of writing used in the workplace that provides facts to inform the reader. When you write a report, you must know the audience who will read your report. How much detail do you need to give for the reader to understand the report?

When you start each paragraph, give your reader an idea of the topic covered in that paragraph and then provide the details. Each paragraph should focus on one topic.

Use words like *next*, *another*, *when*, *also*. You should also repeat important words throughout the report to make connections clear.

Make sure that each sentence is complete and clear. One confusing sentence can make the entire report difficult to understand.
