

# Cell Design and Pull Systems

---

After you complete the class, return to the page with the class vocabulary list on it.

You have a job in a shop where you seem to spend half your time walking from task to task. After finishing this class, you have some ideas for how the shop could be organized, and you're thinking of talking with the boss. Before you do, you need to be sure your thoughts on this topic are clear.

Write a paragraph that explains how to run a shop based on a cell design. Use as many vocabulary words as you can, and underline them as you use them.

Then write a second paragraph that contrasts a cell design with a disorganized set-up. Point out as many advantages as you can. Your explanation would make sense to someone who has never heard of this kind of shop design.

## Writing tips

---

As you begin each paragraph, give your reader a general statement of the topic covered in that paragraph and then provide the details.

Also make sure that **each sentence is complete and clear** on its own. If a sentence is confusing, then perhaps your thinking is not clear.
