

# Intro to Mechanical Systems 100

---

Mechanical advantage is key in industry and manufacturing. This class describes a number of systems for creating mechanical advantage, and most of them are a part of the everyday tools of your life.

Pick three of the ways of creating mechanical advantage this class describes. Write a paragraph for each that explains how it works and gives examples from your experience.

## Writing tips

---

As you begin a paragraph, give your reader a general statement of the topic covered in that paragraph and then provide the details. Each paragraph should focus on one topic.

Also make sure that **each sentence is complete and clear** on its own. Read your work out loud when you are done to help you find confusing or incorrect sections.
