

Name: _____

Date: _____

Room Renovation Project

Your objective for this project is to renovate the room. You are to measure out a classroom and calculate how much it will cost to:

1. Add drywall to the walls and ceiling
2. Add tile or hardwood to the floor
3. Add baseboards and shoe molding around the room
4. Paint the entire room

You will need a tape measure and a calculator to complete this assignment. You may use any home improvement website to get the cost of the materials. Please include the type and size of the materials you used for this renovation. (Some of these materials can come in various sizes which will affect the amount needed to complete the project.) When you are done, write up an estimate for this renovation and give it to you instructor. Please show you calculations on the back of this sheet.

Material(s)	Description	Price per unit	Amount needed	Total Cost
